

CARLOS MIHANOVICH

FULL STACK WEB DEVELOPER

PERSONAL PROFILE

I am a Full-stack Web Developer that looks to increase my experience in the web development world. I also have extensive experience working in business centers and providing services to international and national clients. I hope to use my experience to provide value in my next job.

WORK EXPERIENCE

Full Stack Web Developer

Freelance | Nov 2019 - Present

- Developing the Chilean landing page and the Chilean and international web games page of the escape games company Enter the Exit.
- Back-end design of a REST API created to manage the clients, menu and delivery orders of a restaurant. MySQL was used for the data base and Node JS dependencies (Express, JWT and Sequelize) for the API development.
- Creation from scratch of a web app to share animated GIFs. Use of programming fundamentals and JavaScript to obtain data from Guiphy.com API. This was done working with asynchronic functions and taking advantage of the browser's native tools.
- Design a Podcast channel landing page. Develop the necessary functionalities to reproduce content, navigate between different pages and page different sections, check the compatibility between different browsers and ensure that the page is fully responsive and add the necessary animate interactions that are necessary to have the page working correctly.

Procurement Associate

ExxonMobil | Jun 2011 - Jun 2019

- Responsible for the administration of a contract portfolio. This portfolio includes IT licences, Software, IT consulting, Finances, Legal, Engineering and Staffing agreements that support company operations.

Oracle Analyst

Grupo ASSA | Oct 2009 - Jun 2011

- AS400 and One World (Oracle) level one and two analyst. Responsible for the analysis and problema resolution of issues related to the administrative and security module. Main clients, Arcor and Johnson & Johnson.
